

BREEZA

INDUSTRIAL

Our fabrication shop was built around a waterjet table and has steadily added capabilities. With our fan and machine shops close by we're able to do much more, including integration and assembly.

Our water-jet table cuts the big stuff, our press break handles up to 10-foot lengths, and our shop is more than capable of handling any order. With design services in house, we're just waiting for you to bring us your idea or problem. We'll be the solution and the production.

FABRICATION

BENDING

- CNC Press Break
- 1/4 Inch Thickness
- 10 Foot Length

CUTTING

- Water Jet - 60x120
-Up To 4 Inches Thick
- Any and All Materials
- Cold Saw
- Laser Capabilities
