

BREEZA

INDUSTRIAL

We engineer and build cooling fans for stationary industrial engines, off-highway vehicles, and ventilation applications. Our engineers can help you choose the correct fan for your new project, or help you resolve cooling and air flow issues on an existing project. We'll help you find the right answer for your needs.

- Diameters from 6 to 54 inches
(Can source larger when needed)
- Aluminum, Anti-static, Glass Reinforced Polypropylene (GRP), Glass Reinforced Nylon (GRN), Glass Reinforced Polyamide Nylon (PAG)

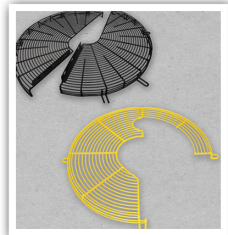

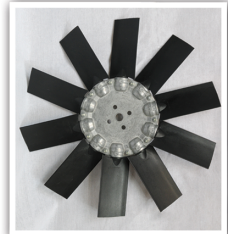

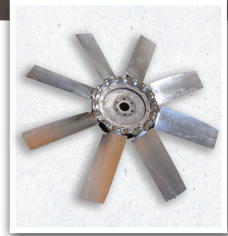

FAN GUARDS

Our engineers design guards to fit the custom shape of your application. No more cutting and fitting a standard size guard to your unique project. Typical lead time is 4-6 weeks, which is less than half of the industry standard.

- One-off or high volume
- Single piece, two-piece, basket or flat
- Powder coated, or zinc plated
- Steel or brass material
- Reasonable design/tooling fees
